Summary

Website: https://artbabarykin.github.io/portfolio

I am passionate about web development and creating intuitive, dynamic user experiences. I build websites and web applications with HTML, CSS, and JavaScript (ES6/ES7).

My framework of choice is React. I have experience working with React Hooks, React Router, Functional Components, Contex API and Redux. For UI styling I use Saas, Less, Styled Components, Material UI and Bootstrap.

In terms of backend provisioning I prefer Firebase (Authentication, Firestore, Cloud Function, Hosting). At the same time I am a certified AWS Cloud Practitioner and have basic knowledge of the Amazon Cloud too. I have experience with GitHub and build processes and am familiar with server-side technologies like Node.js (Express), relational databases (MongoDB) and REST APIs.

I am a well organized, responsible and easy to work with person. Always enjoying to working on finding the best solution and optimizing processes.

Skills

HTML5, CSS3, JavaScript, React, Firebase, TypeScript, Node.js, Express, MongoDB, Sass, Git, Linux, AWS, Photoshop

---

Experience

- Building modern websites and web-applications with HTML5, CSS3 and JavaScript(ES6/ES7).
- Experience working with React.js including Functional Components, React Hooks, React Router, Contex API and Redux.
- Backend provisioning with Firebase (Authentication, Realtime Database, Cloud Function, Hosting).
- CSS pre-processing platforms, such as SASS.
- Styling UI components with Material UI and Styled Components.
- Setting up Payment Gateway with Stripe.
- Familiarity with server-side technologies like Node.js (Express) relational databases (MongoDB) and REST APIs.
- Working knowledge of GIT and build processes.

Education

Linux Systems Administration

IT-Academy • Coding Bootcamp
12/2021

Web Application Development with JavaScript

IT-Academy • Coding Bootcamp
09/2021

Music Theory and Composition

Oginsky Music College • Molodechno, Minsk
06/2010

Certificates

AWS Certified Cloud Practitioner
